

Durovac

Robust workhorse

The Durovac dry vacuum cleaner is an all-purpose, high-performance cleaning device you can absolutely rely on. And all that without making a big fuss. The innovative Defined Air Pressure "DAP" technology delivers high vacuuming performance while keeping the noise level to a minimum. Suction is supported by the large pre-filter, which ensures free passage for the air.

Made to last: sturdy construction and ergonomic design

The reinforced plastic housing reliably protects the inner workings of the Durovac dry vacuum cleaner. During work breaks or at the end of the day, the tube is simply clipped onto the housing. For easy transport, the tube can be placed into the carry handle.

Low maintenance and easy handling: a reliable everyday helper

The Durovac dry vacuum cleaner is virtually maintenance-free. Filter changes and cleaning are quick jobs for this model. Replacing the power cable is just as easy – no need for tools.

Large-surface pre-filter: make way for clean air!

The 3,200 cm² of filter surface area retains the dust yet allows the air to flow freely. The Class M pre-filter protects the motor against dust and ensures a long service life. The exhaust air does not stir up dust, as it is routed upwards into the room on exiting from the machine.

Defined Air Pressure: precise airflow control

The Defined Air Pressure (DAP) technology for airflow and air pressure control by Wetrok is based on physical studies and represents an elegant solution for the conflict between suction power and noise development. The airflow-optimised suction hose and the generously dimensioned pipe diameter of 35 mm significantly increase vacuuming performance.

Durovac: performance par excellence

- «Defined Air Pressure» DAP: sophisticated airflow technology
- Large-surface pre-filter, 3200 cm²: perfect filtration and high air throughput
- Built for a long service life: robust and unbreakable
- Four wheels and an oval design: won't tip over, easy to manoeuvre in any work situation
- Receptacles for accessories: quick nozzle changes
- Compliant with the EU Ecodesign Directive 666/2017, in force as of September 2017.
