## Wetrok Scrubo

## Scrubo – the new baby from Wetrok

This Scrubber Drier is small and truly powerful. Despite of being small, Scrubo’s performance is second to none. With a tank capacity of 33l it can easily cover 1000m². Or to put it another way: clean for 70 minutes without a pit-stop.

### An incredible offer

- Powerful Surface Performance: With a tank filling of 33l Scrubo has the biggest tank in its class. This means it can clean for 70 minutes without a pit-stop.
- Long Operation Time: The Wetrok Scrubo can clean for up to 2 1/2 hours per battery charge.
- High Manoeuvrability: Tight and cluttered areas are easy to clean thanks to its compact built.
- Clear View: Thanks to its functional design a clear view ahead of the machine is guaranteed at all times.
- Easy Handling: The controls are perfectly placed in a direct and ergonomic way on the handle. A comfortable stride is possible because the shaft is individually adjustable.
- Suitable for all climate conditions: Thanks to well protected parts. Scrubo can also be used in high humidity.
- Wetrok Quality Standard: 2-year warranty from date of delivery or up to 1000 working hours.

1

1 **Small, practical, great!** The working components (pad drive disc, pads and brushes) of Wetrok Single-Disc Machines and Servomatic 43KA can also be used for Scrubo. The deflection wheel allows perfect cleaning along walls, in corners and niches without leaving any marks. Scrubo is available mains operated and battery operated.

2

2 **Completely adapts to you!** The handle can be individually adjusted to fit the size of each operator which allows for a comfortable stride. Thanks to big non-marking wheels Scrubo can be effortlessly transported onto the next objective. Scrubo also fits into a vehicle without any difficulties thanks to its fully retractable handle.

3

3 **All under one lid!** The interior of the Scrubo is certainly something to be proud of. Through the big and transparent tank lid the filling or foam level of the dirty water tank is always visible and therefore controllable. The tank is easy to reach and quick to clean. The black fresh water tank lid acts as dosing aid (0.35 l).

4

4 **Ready, set, vacuum!** The squeegee bar lowering mechanism is placed perfectly on the handle. It can be effortlessly operated from the handle. Suction and water supply are simply started by the 2-key system on the handle. The self drive can be adjusted specifically to your needs. Safety has also been taken into account: The brush motor can only be started after disabling the child-proof safety catch (push button).

## When it gets tight – Scrubo!

Being the smallest Scrubber Drier it loves to put its nose right into the tightest corners and clean. It is especially suitable for cluttered, smaller and medium sized areas which for example can be found in supermarkets, petrol stations, workshops, schools and also in offices and administration buildings.

Technical specifications	Scrubo 43 E	Scrubo 43 B
Voltage	230–240 V	24 V DC
Theoretical surface performance	1720 m²/h	1720 m²/h
